

Tong Heng Lee

# INVITATION

Qing-Guo Wang

On behalf of the 4th Asian Control Conference (ASCC 2002), we are very pleased to invite you to attend the Conference. The Asian Control Conference is a major control event which is organized and held in Asia. It provides researchers, engineers and professionals worldwide with excellent opportunities to get together and exchange their findings and views.

As the conference dates draw near, we have planned a full program for the participants. There will be 3 keynote speeches to be presented by Professor K S Narendra, Professor H Kimura and Professor W H Kwon. On the 24 September, 3 workshops have been planned and we believe they are very beneficial to researchers who are working in the areas of process control, backstepping and disk drive technologies. As you may be aware, Singapore is the largest supplier of the world's disk drives, so come and join us to hear the latest in the industry. For the rest of the technical program, we have about 400 papers which will be presented over two and a half days, all at one of Singapore's largest convention center, Suntec Singapore.

On the social side, we have made arrangements for a grand banquet at the Orchid Country Club. This will be held in the evening of 26 September. There will also be a welcome reception on the evening of 24 September at the Conrad International Hotel. Lunches for all 3 days of the conference will also be provided to all participants.

Singapore plays host to some of the most interesting attractions in Asia, ranging from the theme park island of Sentosa, to the wildlife preserves of the Jurong Birdpark, Singapore Zoological Gardens and the Night Safari. Come and join us to also discover Singapore. The well-connected mass transportation system makes getting around the island convenient and hassle-free. Singapore also serves as the jumping point to other exciting destinations in South-East Asia.

We look forward to seeing you at ASCC 2002. For more information, you may visit the conference web site at <http://ascc2002.nus.edu.sg>.
