

Paper title: "Learning by Propagability"

Paper authors: Bingbing Ni, Shuicheng Yan, Loong Fah Cheong, and A. Kassim.

The award carries a prize of SGD\$1000.

The major contribution of this work is that it is the first work considers uncertain labels' propagation in the graph constructed on optimal feature space, as well as a unified framework for label propagation, feature extraction, supervised/semi-supervised learning and multi-class discriminative dimensionality reduction.

Bingbing Ni received his B.Eng. degree in Electrical Engineering from Shanghai Jiao Tong University (SJTU), China in 2005. He is currently a Ph.D. candidate in Electrical and Computer Engineering at the National University of Singapore (NUS), under the supervision of Dr. Shuicheng Yan and A/P Ashraf Kassim. His research interests are in the areas of computer vision and machine learning.
