

ReadMe file for image database used for scene recognition experiments

Download and unzip the two zipped files:

- “reference\_scenes.zip” -- contains all images that are used in the reference database
- “test\_scenes.zip” – contains all images that used for testing, both positives and negatives.

In “reference\_scenes.zip”, there are 4 subfolders: “IND”, “NS”, “SBWR” and “UBIN” that contains the reference images for the 4 databases described in the paper.

In “test\_scenes.zip”, there are 2 subfolders “frame 1” and “frame 2” that contains the images captured in the first and second frames of a TBL arc. In all tests, we set the first frame of the camera such that it is to the left of the second frame.

In each subfolder are 4 folders: “IND”, “NS”, “SBWR” and “UBIN” that contains the test scenes for a particular frame obtained from the 4 databases described in the paper.
