

Summary: Sunflower Sea Café

- The Sunflower Sea Café provides a very comfortable environment for the customers to enjoy their romantic vacation here.
- During the day, the **Sunflower Umbrella** tracks the sun so that customers will always be under the shade. If the sky becomes dark, the night light will be automatically on. Customers can even adjust the light intensity if they want to read books or sleep for a while.
- When the temperature goes very high, the **Smart-Breeze System** will automatically speed up to cool them down. Of course, customers also can choose their desired fan speed.
- The **Smart Chair** detects the customer's presence and activates the other systems. Customers also can turn on the chair massager to relax themselves while enjoying the wonderful resort views.
- Customers can place orders and book activities with ease using the **Beachside Console**. The time needed for customers to wait will be shown so that customers no need to worry about when the food or drinks will come. Seamless log-in/log-out system using the hotel card is added for swift payment. Waiter will come immediately if customers need help or call for a dune buggy for transport.
- The Customer Service Officer (CSO) can view orders and respond quickly to the customer's requests via the **Virtual Waiter**. The CSO can also send promotional messages to the customer's screen.
- What if rain comes? No need to worry; the **Rain-Shield Roller Blind** will automatically roll down to fully protect customers from the rain thus allowing customers to enjoy the aesthetic panorama of the resort.
- All in all, the aim of our Sunflower Sea Café is to provide the best services to customers and make their journey here more memorable.
